

Snapshot

- ✓ Tech Lead with 12+ years experience in AI/ML, Data Engineering, and Cloud Architecture.
- ✓ Extensive experience as part of a solution engineering team, driving end-to-end architecture from problem definition to deployment.
- ✓ Strong expertise in GenAI, RAG, NLP, MLOps and AIOps.
- ✓ Experienced in leading teams and delivering production-grade AI solutions.
- ✓ Architecting scalable ML/data platforms using microservices, event-driven, and real-time/batch processing patterns.
- ✓ Strong domain expertise in Supply Chain (primary), with additional experience across Healthcare, Real Estate, and Cybersecurity.

Work Experience

- TAO Digital – Tech Lead | Hyderabad | APR 2024 – PRESENT

- Built an AI system for real-time anomaly detection with a RAG-based chatbot for querying incidents, runbooks, and knowledge graphs.
 - Multiple POC for demonstrating clients.
 - Document Intelligence & Video Analytics platforms using OCR, NLP, and LLMs.
 - Led cloud-native architecture on AWS, integrating ML pipelines and APIs.
 - Managed team of 2 engineers, driving solution design and delivery.
- Turing - ML Engineer | Remote | AUG 2021 – JAN 2024

Client: Johnson & Johnson | Supply Chain & HealthCare

- Built intelligent document processing systems using OCR, NER, and ML models.
 - Developed predictive models for OTIF classification and analytics use cases.
 - Implemented LLM-based (BART, T5, PEGASUS) summarization and NLP pipelines.
 - Designed scalable pipelines integrating APIs and cloud-based data systems.
 - Deployed models using Azure Helm charts and Azure Ops.
- Wipro - Consultant | Bangalore & Remote | NOV 2018 – AUG 2021

Client: Cisco | Supply Chain

- Built ML models for order risk prediction and supply chain optimization
 - Developed data pipelines using Hadoop, APIs, and enterprise databases
 - Designed anomaly detection for pricing and supplier discrepancies
 - Enabled data-driven procurement and decision-making
- Virtusa – Associate Consultant | Chennai & Bangalore | MAY 2016 – NOV 2018

Client: Cisco | Supply Chain & Digital Marketing

- Delivered analytics solutions for Value Engineering and cost optimization across the product lifecycle.
 - Designed data pipelines for campaign analytics (email, social, web) using the Big Data ecosystem (Spark, Hadoop) to improve marketing insights.
 - Built Tableau dashboards for ROI, Spend, and Savings metrics.
- Immo Info Tech – Jr Statistician | Goa | AUG 2014 – APR 2016

- Worked on hedonic price models in R using linear regression, PCA techniques with location and real estate variables.
 - Migrated statistical models from S+ to R.
 - Validated models by comparing time-period indices.
 - Performed data processing, model validation & developed Shiny dashboards.
- Hydus – Business development executive | Hyderabad | OCT 2013 – May 2014

Generates leads, conducts cold calls, and researches target companies.

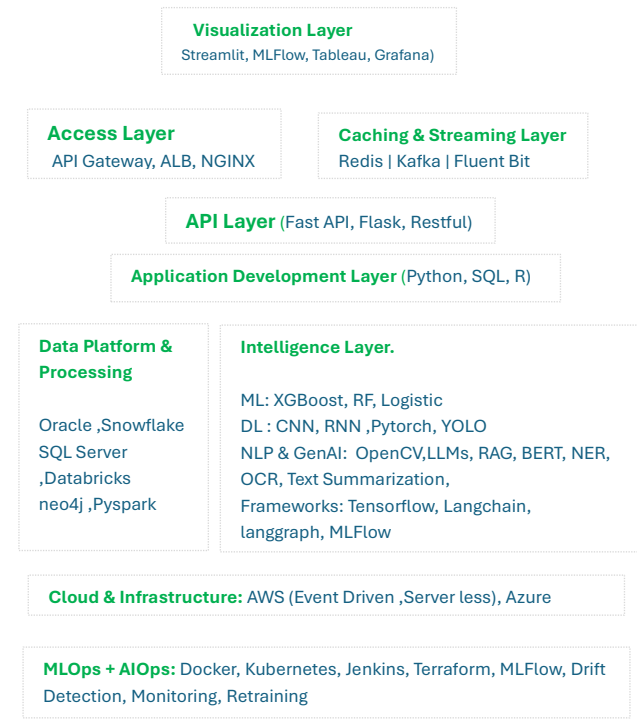

Education

- PGDM (ICT Management) – ISTTM Business School | CGPA: 7.1 | 2013
- B. Tech (ECE) - JNTU Kakinada | 71% (Distinction) | 2011

Certifications

- AWS Certified Machine Learning – Specialty – (Nov 2025)
- HADOOP Horton works - (Aug 2017) --Hadoop Big Data
- IBM – Developer guide to the IOT (Coursera) -2018
- Deep Learning Specialization – Andre NG (Coursera) -2018
- IIT – Hyderabad (June 2014) -- Advanced analytics training

Tech Stack

Key Projects

- Document Intelligence Platform
 - Built OCR + NLP + GenAI pipeline for automated document processing and metadata extraction
- AI Observability Chatbot
 - Developed GenAI chatbot integrating logs and anomaly detection for real-time insights
- Supply Chain Predictive Analytics
 - Built ML models for order risk prediction and anomaly detection in supplier data
- Smart Document Processing System
 - Designed multi-format document ingestion using OCR, NER, and classification models
